Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 10 January 2008.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 14-16, 18, 21, 22, 25, and 26 are rejected under 35 U.S.C. 102(b) as being anticipated by US Patent Application Publication 2002/0043436 to Burgdorf et al.

Re: claims 14-16, 18, 21, 22, 25, and 26. Burgdorf et al. show in figure 1 a disc brake for a vehicle comprising: a pair of brake pads 14 configured to press a disc rotor, a supporting member 3 that supports the pair of brake pads for movement in an axial direction of the disc rotor, a return spring 50 that has a base end shown in the area at the end of the lead line of number 13 attached to one of the brake pads and a distal end shown in the area of the end of the lead line of number 16 configured to press the supporting member so as to urge by reaction the one of the brake pads in the axial direction away from the disc rotor, wherein the return spring extends from the base end generally in the axial direction away from the brake pad and is folded back as shown under element 12 to extend towards the brake pad so that the distal end presses the supporting member, and at least one wall shown in the area of the end of the lead line of number 16 that elevates adjacent to the distal end of the return spring to limit at least one of clockwise and counter clockwise movements of the distal end around the base end relative to the supporting member, wherein the return spring abuts in a rotational

Art Unit: 3683

direction thereof against the at least one wall and a reaction force received by the return spring from the at least one wall upon abutment against the at least one wall, exclusive of a frictional force from the at least one wall, comprises some force acting against the return spring in the direction opposite to the rotational direction of the return spring.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 28 rejected under 35 U.S.C. 103(a) as being unpatentable over Burgdorf et al.

Burgdorf et al. are silent with regards to there being another return spring.

In re Harza, 274 F.2d 669, 124 USPQ 378 (CCPA 1960) the court held that mere duplication of parts has no patentable significance unless a new and unexpected result is produced.

Allowable Subject Matter

5. Claims 17, 19, 20, 23, 24, and 27 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

6. Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
